PROFESSIONAL SUMMARY

Full-stack Software Developer with almost 4 years of experience designing, developing, testing, and maintaining production web applications in Agile environments. Experienced in translating business requirements into scalable technical solutions, building RESTful APIs, integrating enterprise systems, and developing modern web applications using Laravel, Next.js, React, and Angular. Skilled in application configuration, debugging, performance optimization, code reviews, and collaborating with cross-functional teams throughout the software development lifecycle. Strong foundation in HTML5, CSS3, JavaScript, SQL, and modern software engineering practices, with experience delivering CMS and ERP-integrated e-commerce solutions.

WORK EXPERIENCE

Guerilla 360 Integrated Solutions

290 Aguirre Avenue, Parañaque, 1720 Metro Manila

Junior Software Developer

April 2023 - July 2026

- Led the end-to-end development and production deployment of the backend for the Cleanline Tasman e-commerce website and CMS using Laravel 11 and Next.js.
- Developed features for the Cleanline Tasman Progressive Web Application (PWA) using Angular 18 and Laravel 11 APIs, enabling corporate customers to manage uniform allocations and workwear orders.
- Developed features for the CYPHER Learning marketplace using HubSpot CMS, including a filterable app directory and category-based discovery UI.
- Delivered SEA integration using Mulesoft Anypoint Studio.
- Developed features for Washwell.ph, a React-based laundry service platform with subscription and booking functionality.
- Developed React components for the Guerilla 360 marketing website, including Freshworks and Monday.com page sections.

Fujitsu Die-Tech Corporation of the Philippines

Laguna Technopark, Biñan, Laguna

IT Staff/Junior Software Developer

November 2022 - April 2023

- Contributed to the development of Fujitsu's Agreement List System, a Laravel and Vue.js web application for agreement tracking and management.
